

Package ‘ATR’

May 6, 2026

Title Alternative Tree Representation

Date 2020-01-08

Version 0.1-1

Description Plot party trees in left-right orientation instead of the classical top-down layout.

Depends grid, partykit

Suggests trtf, mlbench

Imports stats

License GPL-2

NeedsCompilation no

 rotate

Change the class of a party object.

Description

Adds a new class to party objects allowing rotated tree visualisations.

Usage

```
rotate(m, to = "left", ...)
```

Arguments

| | |
|-----|--|
| m | an object of class party |
| to | a character, only left is implemented at the moment. |
| ... | additional arguments, currently ignored. |

Details

Adds a new class allowing for improved tree printing.

Note

This package was written by the students participating in the Advanced R Programming course taught in spring semester 2017 at University of Zurich.

Examples

```
data("airquality", package = "datasets")
m <- ctree(Wind ~ . , data = airquality)
plot(rotate(m), main = "TREE", tnex = 1.5)

if (require("trtf")) {
  data("Ozone", package = "mlbench")
  Ozone <- subset(Ozone, complete.cases(Ozone))
  Ozone <- as.data.frame(lapply(Ozone, function(x) {
    x <- x[, drop = TRUE]
    if (is.factor(x)) return(as.ordered(x))
    x
  })))
  response <- "V4"
  Ozone[[response]] <- as.numeric(Ozone[[response]])

  ns <- 20
  fm <- V4 ~ V1 + V2 + V3 + V5 + V6 + V7 + V8 + V9 + V10 + V11 + V12 + V13
  mtry <- ceiling(length(all.vars(fm[[3]])) / 3)
  var_m <- numeric_var("V4", support = quantile(Ozone[[response]], prob = c(.1, .9)),
    add = range(Ozone[[response]]) -
      quantile(Ozone[[response]], prob = c(.1, .9)),
```

```
        bounds = c(0, Inf))

B_m <- Bernstein_basis(var_m, order = 4, ui = "increasing")
uc_ctm_Ozone <- ctm(B_m, data = Ozone, todistr = "Normal")

tt_Ozone <- trafotree(uc_ctm_Ozone, formula = fm, data = Ozone,
                     control = ctree_control(mincriterion = .95, minsplit = 2*ns,
                                             minbucket = ns))

plot(rotate(tt_Ozone), tp_args = list(type = "density", id = FALSE,
                                     ylines = 0, K = 100, fill = "lightgrey"),
     terminal_panel = trtf:::node_mlt)
}
```
