

Package ‘inplace’

May 8, 2026

Version 0.1.2

Date 2020-08-24

Title In-place Operators for R

Description It provides in-place operators for R
that are equivalent to '+=', '-=', '*=', '/=' in C++.
Those can be applied on integer|double vectors|matrices.
You have also access to sweep operations (in-place).

inplace-op

In-place operators

Description

In-place operators

Usage

`x %*%-> value`

`x %+%-> value`

`x %<%-> value`

`x %/<%-> value`

Arguments

<code>x</code>	Variable.
<code>value</code>	Value.

Value

NULL (invisibly).

Examples

```
mat <- matrix(1:4, 2)
mat
mat %+%-> 2
mat
```

inplace-sweep

Sweep

Description

Sweep

Usage

```
sweep1_in_place(x, STATS, FUN = c("-", "+", "*", "/"))
```

```
sweep2_in_place(x, STATS, FUN = c("-", "+", "*", "/"))
```

Arguments

x a matrix.
STATS the summary statistic which is to be swept out.
FUN the function to be used to carry out the sweep.

Value

NULL, invisibly.

Examples

```
x <- matrix(1:6, 2)
sweep(x, 2, 1:3)
x
sweep2_in_place(x, 1:3)
x
```
